Table 3 on page 86 in Huhta, A.-P. & Rautio, P. 2005: Condition of semi-natural meadows in northern Finland today — do the classical vegetation types still exist? — *Ann. Bot. Fennici* 42: 81–93, should read:

Table 3. Pearson's (or in case of Conservation value Spearman's) correlation coefficients between measured variables. $N = 128$ (except in years after abandonment $N = 118$). * = $P < 0.05$, ** = $P \leq 0.01$.
