

Contents of Volume 38

Basolo, A. L.: The effect of intrasexual fitness differences on genotype frequency stability at Fisherian sex ratio equilibrium	297–304
Bednekoff, P. A.: Coordination of safe, selfish sentinels based on mutual benefits	5–14
Bouskila, A.: A habitat selection game of interactions between rodents and their predators	55–70
Brown, J. S., Kotler, B. P. & Bouskila, A.: Ecology of fear: Foraging games between predators and prey with pulsed resources	71–87
Crozier, R. H. & Fjerdingstad, E. J.: Polyandry in social Hymenoptera — disunity in diversity?	267–285
Dall, S. R. X., Kotler, B. P. & Bouskila, A.: Attention, ‘apprehension’ and gerbils searching in patches	15–23
Daly, M. & Wilson, M.: An assessment of some proposed exceptions to the phenomenon of nepotistic discrimination against stepchildren	287–296
Foster, K. R., Wenseleers, T. & Ratnieks, F. L. W.: Spite: Hamilton’s unproven theory	229–238
Galvani, A. P., Coleman, R. M. & Ferguson, N. M.: Antigenic diversity and the selective value of sex in parasites	305–314
Getz, W. M.: Competition, extinction, and the sexuality of species	315–330
Getz, W. M., Page, R. E. Jr. & Starks, P. T.: Introduction: A Tribute to William Donald Hamilton (1936–2000)	187–188
Kaitala, A. & Katvala, M.: Sexual interactions and conspecific exploitation in an egg-carrying bug	215–221
Kaitala, V. & Kaitala, A.: Altruism, intraspecific parasitism and reciprocity: egg carrying in the golden egg bug	223–228
Kojola, I. & Laitala, H.-M.: Body size variation of brown bear in Finland	173–178.
Kotta, J. & Orav, H.: Role of benthic macroalgae in regulating macrozoobenthic assemblages in the Väinameri (north-eastern Baltic Sea)	163–171
McNamara, J. M.: The effect of adaptive behaviour on the stability of population dynamics	25–36
Mitchell, W. A. & Porter, W. P.: Foraging games and species diversity	89–98
Moreno, J., Potti, J., Yorio, P. & Borboroglu, P. G.: Sex differences in cell-mediated immunity in the Magellanic Penguin <i>Spheniscus magellanicus</i>	111–116
Morris, D. W.: Learning from the games animals play: using behavior to assess spatial structure and stochasticity in natural populations	37–53
Nonacs, P.: A life-history approach to group living and social contracts between individuals	239–254
Nummi, P. & Väänänen, V.-M.: High overlap in diets of sympatric dabbling ducks — an effect of food abundance?	123–130
Pérez-Tris, J., de la Puente, J., Pinilla, J. & Bermejo, A.: Body moult and autumn migration in the barn swallow <i>Hirundo rustica</i> : is there a cost of moulting late?	139–148
Pöysä, H., Sjöberg, K., Elmberg, J. & Nummi, P.: Pair formation among experimentally introduced mallards <i>Anas platyrhynchos</i> reflects habitat quality ..	179–184
Rantala, M. J., Hovi, M., Korkeamäki, E. & Suhonen, J.: No trade-off between the size and timing of emergence in the damselfly, <i>Calopteryx virgo</i> L....	17–122
Ratnieks, F. L. W., Monnin, T. & Foster, K. R.: Inclusive fitness theory: novel predictions and tests in eusocial Hymenoptera	201–214
Rintamäki, P. T., Höglund, J., Alatalo, R. V. & Lundberg, A.: Correlates of male mating success on black grouse (<i>Tetrao tetrix</i> L.) leks	99–109
Rosenzweig, M. L.: Optimality — the biologist’s tricornider	1–3
Smallwood, K. S. & Smith, T. R.: Study design and interpretation of shrew (<i>Sorex</i>) density estimates	149–161
Starks, P. T.: Alternative reproductive tactics in the paper wasp <i>Polistes dominulus</i> with specific focus on the sit-and-wait tactic	189–199
Tarpy, D. R. & Page, R. E. Jr.: The curious promiscuity of queen honey bees (<i>Apis mellifera</i>): evolutionary and behavioral mechanisms	255–265
Tryjanowski, P.: Proximity of raven (<i>Corvus corax</i>) nest modifies breeding bird community in an intensively used farmland	131–138
